### AEI REDELIVERS FOUR 737SF's IN 3RD QUARTER 2010

MIAMI, FL., --September 7, 2010-- Aeronautical Engineers, Inc. (AEI), is pleased to announce that it has redelivered four 737SF conversions in the 3rd Quarter of 2010. The first aircraft, a B737-300, MSN 23970 was built in 1987 and redelivered to Cargo Air in Bulgaria. The second aircraft, a B737-400SF, MSN 24128 was built in 1989 and redelivered to MNG Airlines in Turkey. The third aircraft, a B737-300SF, MSN 24060 was built in 1988 and redelivered to Sideral Air Cargo in Brazil. The fourth aircraft, a B737-200SF, MSN 23796 was built in 1987 and redelivered to Transmile Air Services in Malaysia.

Mr. Robert T. Convey, Vice President of Sales & Marketing for AEI stated that "The redelivery of four B737SF's in one quarter is a strong indicator that economies around the world are starting their upwards journey towards recovery. The narrow body freighter market is unique in that it magnifies regional demand for the movement of raw and finished goods better than any other mode of transportation." Mr. Convey goes on to say that "On behalf of the entire AEI team I would like to congratulate the four operators for having the courage and foresight to invest in the conversion of additional aircraft during this period of economic recovery."

#### About AEI

Formed in 1958, Aeronautical Engineers, Inc. (AEI) is the oldest conversion company in existence today. For more than 50 years AEI has provided advanced engineering solutions to aircraft owners and operators. Today the company is a global leader in passenger to freighter conversions for a wide array of aircraft, helping customers extend the life of the aircraft and increase the value of their asset. AEI has developed over 120 Supplemental Type Certificates (STCs) and 350+ aircraft have been modified with AEI STCs – more than any other conversion pro-
