TRANSMILE SELECTS AEI B737-200SF CONVERSION

MIAMI, FL., --June 9, 2010-- Aeronautical Engineers, Inc. (AEI), is pleased to announce that it has been selected by Transmile Air Services of Malaysia to provide one B737-200SF 8 Pallet Configuration, Passenger to Freighter Conversion. The aircraft, a B737-200, MSN 23796, 9M-PMZ was built in 1987 and will be their second AEI converted freighter. Transmiles first AEI Freighter Conversion, a B737-209SF, MSN 24197, 9M-PMW was completed by Commercial Jet in March 2005. MSN 23796 is currently undergoing freighter modification and heavy maintenance at AEI's Authorized Conversion Center, Commercial Jet, Inc. which is located in Miami, Florida.

Mr. Robert T. Convey, Vice President of Sales & Marketing for AEI stated that "The induction of the Transmile B737-200, along with three other B737's earlier this year demonstrates that the freighter conversion market is beginning to return to normal and that cargo airlines are seeing real demand which requires additional lift." He goes on to say that "AEI is currently the only conversion company that offers B737-200 conversions and that demand for this aircraft type is increasing worldwide".

AEI's B737-200SF 8 Pallet Configuration shall provide Transmile with a Main Deck capable of carrying:

- Seven Full Height 88"x125" AAA container positions in P1-P7 and one 88"x108"x82"high netted pallet in P8

AEI has converted 19 B737-200SF aircraft for 6 customers worldwide.

About AEI

Formed in 1958, Aeronautical Engineers, Inc. (AEI) is the oldest conversion company in existence today. For more than 50 years AEI has provided advanced engineering solutions to aircraft owners and operators. Today the company is a global leader in passenger to freighter conversions for a wide array of aircraft, helping customers extend the life of the aircraft and increase the value of their asset. AEI has developed over 120 Supplemental Type Certificates (STCs) and 350+ aircraft have been modified with AEI STCs – more than any other conversion provider.
