For Immediate Release

WORLD'S ONLY TEN AAA B737-400SF SELECTED FOR ANOTHER CONVERSION

MIAMI, FL., --October 12, 2010-- Aeronautical Engineers, Inc. (AEI), is pleased to announce that it has been selected by an undisclosed customer to provide one B737-400SF, 11 Pallet Configuration Passenger to Freighter Conversion. The aircraft, a high gross weight B737-400 was built in 1989 and is currently undergoing freighter modification and heavy maintenance at AEI's Conversion Center, Commercial Jet, Inc. which is located in Miami, Florida.

Mr. Robert T. Convey, Vice President of Sales & Marketing, stated that "AEI's B737-400SF 11 Pallet Configuration was selected because it is the only conversion that can accommodate ten (10) full height AAA containers". He goes on to say that "Competing 737-400 conversion products can only accommodate nine (9) full height, 88" x 125" AAA containers due to their Main Deck Cargo Door and 9 G Barrier locations."

AEI's B737-400SF 11 Pallet Configuration is made possible because the Main Deck Cargo Door location is set 40" further aft than the competitions. This "Aft" door location allows for one full height 88" x 125" container to be placed forward of the Main Deck Cargo Door, which in turn allows room for the remaining nine units.

AEI's B737-400SF 11 Pallet Configuration can accommodate;

- Ten Full Height 88"x125"x82" AAA container positions in P1-P10 and a 53"x88"x64"high pallet in P11

About AEI

Formed in 1958, Aeronautical Engineers, Inc. (AEI) is the oldest conversion company in existence today. For more than 50 years AEI has provided advanced engineering solutions to aircraft owners and operators. Today the company is a global leader in passenger to freighter conversions for a wide array of aircraft, helping customers extend the life of the aircraft and increase the value of their asset. AEI has developed over 120 Supplemental Type Certificates (STCs) and 360+ aircraft have been modified with AEI STCs – more than any other conversion provider.
