AEI to Provide Thirteen (13) Additional B737-800SF Freighter Conversions to Aero Capital Solutions

Miami, Florida – November 15th, 2021 – Aeronautical Engineers, Inc. (AEI) announces today the company will provide Austin-based, Aero Capital Solutions, Inc. (ACS), with 13 additional B737-800SF freighter conversions. Upon completion of this new order, ACS will have a total fleet of 34 AEI B737-800SF freighter conversions, making the company AEI's largest customer to date for the B737-800SF.

The first aircraft of this new order will commence modification in March 2023, with all modification and maintenance requirements to be performed by the authorized AEI Conversion Center, Commercial Jet, in Miami, Florida. The remaining 12 aircraft will be modified and distributed between Commercial Jet, KF Aerospace and HAECO Xiamen. The last aircraft of this order will commence modification in December 2023.

The AEI converted B737-800SF freighter offers a main deck payload of up to 52,700 lbs. (23,904 kg) and incorporates eleven full height 88" x 125" container positions, plus an additional position for an AEP/AEH. The conversion also incorporates new floor beams aft of the wing box, a large 86" x 137" Main Cargo Door with a single vent door system.

AEI's forward-thinking design allows for containers to be loaded into the aircraft a full 16.5" aft of the forward door jamb, ensuring ground operators have sufficient maneuvering room which minimizes potential door and aircraft strikes. Additionally, the AEI B737-800SF includes a flexible Ankra Cargo Loading System, a rigid 9g barrier, five supernumerary seats as standard, a galley, and full lavatory.

When combined with proven reliability, the AEI converted B737-800SF will help ACS and their lessees to keep their freighter fleet ***in the air, generating revenue.***

About AEI

Aeronautical Engineers, Inc. (AEI) is a global leader in the aircraft passenger-to-freighter conversion business and is the oldest conversion company in existence today. Since the company's founding in 1958, AEI has developed over 130 Supplemental Type Certificates (STCs) and has modified over 535 aircraft with the STCs. AEI helps its customers extend aircraft life and increase the overall value of aircraft assets by continuously focusing on dependable and flexible product offerings. AEI currently offers passenger-to-freighter conversions for the Boeing 737-800, 737-400, 737-300, MD-80 series, and CRJ200 aircraft. www.aeronautical-engineers.com.

About Aero Capital Solutions

Aero Capital Solutions, Inc. ("ACS") is a leading mid-life aircraft leasing platform that has deployed in excess of USD \$2.5 billion in aircraft assets since inception in 2010. Having executed more than 300 unique aircraft and engine transactions since 2017, ACS has built a portfolio of over 180 assets with 35 lessees in 24 countries. ACS continues to focus on opportunities that emphasize its "metal expertise" and active investment management approach through offices in Austin (USA), Dublin (Ireland), and Singapore.
